The parties in this matter agree to the terms and conditions of the attached Stipulation as the final disposition of this matter, subject to the approval of the Veterinary Examining Board (Board). The Board has reviewed this Stipulation and considers it acceptable.

Accordingly, the Board in this matter adopts the attached Stipulation and makes the following Findings of Fact, Conclusions of Law and Order.

FINDINGS OF FACT

1. Respondent Marla K. Lichtenberger, D.V.M., (dob February 16, 1953) is licensed in the state of Wisconsin to practice veterinary medicine, having license number 4253-50, first granted on September 28, 1994, and current through December 14, 2015. Respondent's most recent address on file with the Wisconsin Department of Safety and Professional Services (Department) is 3670 South 108<sup>th</sup> Street, Greenfield, Wisconsin 53228.

2. At all times relevant to this proceeding, Respondent was employed as a veterinarian at a clinic (Clinic) located in Greenfield, Wisconsin.

Case No. 13 VET 037

3. On October 13, 2013, the Department received a complaint that Respondent missed an esophageal foreign body during a canine stomach surgery and post-operative observation period, necessitating another surgery.

4. During the investigation of this matter, Respondent was practicing with an expired license from December 17, 2013 to December 22, 2013.

Case No. 13 VET 040

5. On October 28, 2013, the Department received a complaint about Respondent's treatment of a cat, Twilight.

6. Twilight was brought to the Clinic after an episode of respiratory distress and kept overnight for treatment.

7. The next day, the Respondent's assistant called the owners indicating that they could pick up Twilight. Within 5 minutes of the initial call, the owners received another call from the assistant indicating that Twilight had passed away.

8. Respondent stated that the owners were called after Twilight was in distress and told to come immediately. Respondent further stated that Twilight was not euthanized, but rather arrested with asystole rhythm 5 minutes after the phone call to the owners and that CPR was attempted but unsuccessful.

9. The owners stated they believed that Respondent administered a dose of potassium solution without Twilight being placed under sedation first and without receiving authorization for euthanasia. The owners stated that full resuscitation orders were in place and there was no discussion about euthanasia.

10. The invoice for the medical care included a charge of \$18.30 for euthanasia solution.

11. Respondent's records pertaining to Twilight do not contain a consent form for euthanasia and do not contain a resuscitation request form.

Case No. 14 VET 001

12. On January 9, 2014, the Department received a complaint about Respondent's treatment of Oliver, a cat.

13. Oliver was brought to the Clinic after he began having signs of urinary tract issues.

14. Upon arrival, the owner informed the receptionist/technician that Oliver had been urinating, just in small amounts and with increased frequency. The owner provided no further symptoms or history. The receptionist/technician took Oliver for a bladder scan.

15. Respondent informed the owner that Oliver was completely blocked by a blood clot, needed to be hospitalized, sedated, catheterized, flushed, given fluids, antibiotics and pain medication. Respondent told the owner that it was a good thing she brought Oliver in because he otherwise might not have made it through the night.

16. The owner requested a second opinion for Oliver at another animal clinic. The owner requested a copy of the visit note. The visit note had several discrepancies in the medical history. The medical history portion was documented as: "There is blood in the urine, cat is acting very painful, cat is hiding, and cat is urinating in unusual places and missing the cat box". The owner was never asked about medical history. There was no written documentation of Respondent's interpretation of the obstructing blood clot. On the report, the Respondent wrote the ultrasound showed an enlarged bladder with floaters.

17. The vet clinic offering the second opinion was able to palpate Oliver's bladder and diagnose Oliver with a partial obstruction.

Case No. 14 VET 003

18. On January 9, 2014, the Department received a complaint about Respondent's treatment of Brutus, a cat.

19. Brutus was brought to the Clinic to receive emergency treatment for respiratory issues.

20. Brutus was at another animal clinic for possible congestive heart failure. The clinic recommended a diuretic treatment and referred them to the Respondent. The clinic sedated Brutus and kept him in an oxygen tent until his transfer to the Respondent.

21. The owner was informed that the Respondent would give Brutus diuretics and he would be kept in an oxygen rich environment overnight. The owner left Brutus, who was still slightly sedated but sitting upright and not in critical condition.

22. Upon returning to work the owner received a call from the Respondent informing her that Brutus was not doing well and she should return right away. By the time the owner returned to the clinic, Brutus had died.

23. According to the medical record "The cat went into respiratory distress and 100ml of chylous effusion was withdrawn. The owner was contacted and opted to stop treatment due to poor prognosis." The medical record also indicated that a thoracocentesis was done and a mass was seen.

24. The owner stated she never consented to stopping any treatments as she did not have any idea treatments were being done and had not consented to a thoracocentesis. Another notation in the medical record stated "Dx: Anterior Medistinal Mass. Cat went into resp distress- euthanized due to condition and prognosis". The owner denies consenting to euthanasia, and Respondent's records concerning Brutus do not contain a consent form for a thoracocentesis or for euthanasia.

25. The owner called the Respondent about the medical record notations and Respondent stated that these were mistakes and proceeded to alter the medical record to state "The cat went into respiratory distress and 100 ml of chylous effusion was withdrawn. The owner was contacted and said she wanted to come in to visit the cat. The cat died before the owner came in to visit".

26. The owner was also charged for procedures that were not done including Etomidate, Furosemide, intubation and others. The owner was given a refund in the amount of \$760.45.

27. In resolution of this matter, Respondent consents to the entry of the following Conclusions of Law and Order.
